PEREGRINE Healthcare

G2211 Quick Reference Guide

Bill This, Not That

Bill This	Do Not Bill
You are the continuing focal point for a patient's health needs (PCP, longitudinal care).	The E/M visit is billed with Modifier 25 for a same-day minor procedure (0- or 10-day global).
You are providing ongoing care for a single, serious, or complex condition (e.g., CHF, HIV, Crohn's, chronic pain).	
The visit reflects continuity, trust, and ongoing management — not just today's problem.	The encounter is discrete, routine, or time-limited (e.g., mole removal, acute UTI, simple fracture, urgent care).
The documentation clearly supports longitudinal care or complex condition management.	Urgent care / second opinions with no follow-up
The patient is likely to return for ongoing management and follow-up.	The service occurs during a global surgical period.
Office, outpatient, or approved telehealth visits 99202–99205, 99211–99215 are billed.Examples:	There is no documented longitudinal or complex care relationship.
May also be billed with certain preventive services (Annual Wellness Visit, vaccine administration, Part B preventive services) when Modifier 25 is appended.	**Clinical Examples:**
Clinical Examples:	Second opinion for surgery, with no follow-up relationship.
PCP visit for sinus infection in a patient also managed for diabetes and hypertension.	Treating acute conjunctivitis or seasonal allergies.
GI managing Crohn's disease or cirrhosis with long-term care plan.	One-time visit for simple UTI.
Urologist following advanced prostate cancer with regular checkups.	Procedure-only visits where Modifier 25 is applied.
Pain specialist providing ongoing chronic pain management.	Acute injury with no chronic care link
